

Call Center in the **CLOUD**

The Greatest Trend of the Future

TelOnline's cloud **PBX** is clearly, a centralized solution for the Internet-based telephony. It is accessible from anywhere your users are and from any device: Softphone, computer or IP desktop phone.

Features Included

**ALL
FROM
\$18**
per user/month

- Supervisor or Agent.
- Unlimited calls between extensions.
- Web Portal (UCP) by extension.
- Web portal for supervisor.
- Supervisor configuration with monitoring and guidance in the calls.
- Softphone for computer.
- Call queues.
- Basic call reports.
- Voicemail.
- Conference calls.
- Basic IVR per solution

Why use a Call Center in the Cloud?

The main advantages would be the elimination of the technical administration of your telephone system, eliminating the payment of software and hardware upgrades to the latest features and functionalities, plus you will have the possibility of growing as your business progresses and get the best price in the market by purchasing our plans from \$18 USD per user.

You can be sure of your decision to hire a Unified Communications solution in the cloud, as it will be the best option for your business.

UNLIMITED PLANS

\$30 /USER

Restrictions apply

Unlimited plans for companies with high or average call volume, or with predictable billing preference.

MEASURED PLANS

\$18 /USER

Restrictions apply

Metered plans offer a low-cost option and are perfect for companies that need flexibility to handle unpredictable call volumes.

TelOnline - At the forefront of Communications
